If the Brontosaurus Brontosaw survived so long, why has their lifespan in the real world become just a few decades? These beasts were once fearsome, but now they're near extinct, thanks to their own appetite for meat eating and the hunters trying to cut them down.Q: C#: Need help with a simple Winforms application error I am developing a small app with some modal dialog boxes which will be shown from forms. In a single form I have a tab control, with controls in each tab. the tab control is visible by default. There are a bunch of button which are hidden by default, they can be shown with the Show() method or by clicking them. When the application starts and the main tab is active, everything works fine and the buttons are not visible. When you click on another tab and switch back to the main tab, the button are still not shown. How can I solve this? The button code in the main form private void showButton(string text, TabControl tabControl) { button1.Visible = true; button2.Visible = true; button3.Visible = true; button4.Visible = true; button5.Visible = true; button6.Visible = true; button7.Visible = true; button8.Visible = true; button9.Visible = true; button10.Visible = true; button11.Visible = true; button12.Visible = true; button13.Visible = true; button14.Visible = true; button15.Visible = true; button16.Visible = true; button17.Visible = true; button18.Visible = true;
